

Wagon Wheel Wind Energy Center

The Wagon Wheel Wind Energy Center is a proposed 600-megawatt (MW) wind power generation facility in Garfield, Kingfisher, Logan, and Noble Counties, Oklahoma targeted to begin operating in 2025. Wind energy is clean, renewable power from one of the oldest known energy sources, and today is one of the most affordable ways to modernize America’s energy grid.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community’s health and safety.

Project Timeline

Project Highlights

More than **\$255 million** invested in local tax revenue, land costs and lease payments, and wages and benefits over the life of the project

600 MW is enough electricity to power more than **210,000 American homes**

More than **200 jobs** supported during construction

Up to **15 full-time** operations and maintenance staff

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy’s Miami Wind Energy Center, located in Gray, Hemphill, and Roberts Counties, Texas.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
