

Bodark Solar Energy Center

The Bodark Solar Energy Center is a proposed 300 megawatt (MW) solar power generation facility in Muskogee County, Oklahoma targeted to begin operating in 2027. Solar technology uses the power of the sun to deliver clean, reliable energy and is one of the lowest-cost energy sources available.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

Project Timeline

Project Highlights

More than **\$160 million** invested in local tax revenue, landowner payments, and wages and benefits over the life of the project

300 MW is enough electricity to power more than **73,000 American homes**

Up to **300 jobs** supported during construction

Up to **3 full-time** operations and maintenance staff

Emissions reductions equivalent to **162 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's 100th project, Southern Oak Solar Energy Center, located in Mitchell County, Georgia.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed nearly 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
